

Time Entry Options with EmpLive®

EmpLive improves the daily work experience for all staff by providing simple and convenient time entry options. EmpLive can populate timesheet data using a variety of options, allowing you to choose the combination of employee time tracking tools that best suits each environment and worker group.

Terminals – Fingerprint, Pin or Smartcard

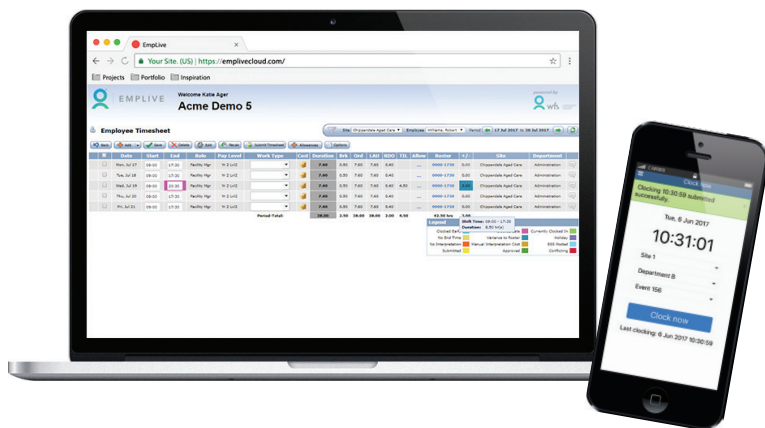

- More accurate time tracking that guarantees people are on site when they say they are
- Biometric identification prevents staff from logging in for each other if they are running late
- Terminals have software built into units and can work standalone (no site PC is required)
- Tight integrations between EmpLive and terminals give site managers current and reliable views
- PIN option is included for those people who are not 'biometric readable'

ClockLive

Web-based method for employees to record "clockings" in and out of jobs in seconds.

- Accessible via any web-enabled device, including PCs, tablets, and smartphones
- An optional USB Biometric device can be paired with ClockLive for an extra layer of authentication and accuracy

Web-based Timesheet

EmpLive also includes a clear and intuitive timesheet that's similarly available through any web-enabled device and:

- Provides an efficient way for employees to report work hours and activities
- Serves as a communication tool due to a built-in message board
- Keeps staff informed of shifts offered to them due to roster changes and other events

Mobile Application

EmpLive also enables users to clock in and out via an easy to use mobile application.

- Accessible anytime and anywhere via a mobile device
- Timesheet is created when employee clocks in and out daily
